International Hemp Fair Poland

Centrum Targowo-Kongresowe Global EXPO

30.11- 02.12.2018

Warszawa

Dear friends,

we would like to proudly announce/invite you to the **Cannabizz.pl 2018**.

On the third weekend in November we will open the European Cannabis Fair in Warsaw and we will change the history of Poland.The biggest Cannabis event in this former communist country will continue the avalanche of changes. Do not miss this unique opportunity!

Poland is the 8th biggest European country which plays an important role. With its **40 million** people it is a huge market. A market which is changing and developing fast. It is surprising but it is/was the last relevant european country without an cannabis hemp fair. Medical cannabis, decriminalization, recreational use and legalization, these topics are current in Poland, like in all other european countries.

Despite conservative reputation there is couple of favorable factors:
Poland was typically rural country (people ive close to agricultural), very low VAT taxes on seeds and fertilizers, polish are famous for their business skill and approach to a business (they can trade literary everything), millions of young polish were/are working abroad (when coming back, especially with upcoming Brexit, they are also bringing back new trends and habits).

Warsaw is the **biggest Eastern European city**. With its almost **2 millions** of habitants and other 1-2 millions living in near by agglomeration has changed a lot last decades. Massive investments from local but mostly European authorities have helped to reconstruct and build modern and effective infrastructure. Local underground scene is also growing pretty strong. The expo will take place in modern building known for expos and public markets. Its over **10000m²** floor space and side facilities are promising enough space for a nice and successful show.

We would like to point out another very important fact. It is very **close to Russia** and **former Soviet and Baltic republics**. Many of you tried to do business in Russia and experienced the difficulties and instability. Poland is the ideal bridge to conquer Russian markets. From North of Poland there are lots of exports **to Scandinavian countries**.

Production team of Cannabizz.pl consists of personalities with over **20 years of experience** of our business and vast experience on the field of marketing and expo business. Unique joint venture of Polish, Czech and German companies and experts will guarantee the coverage not only of Poland but the whole central Europe. We are aware of the unique opportunity and our ambitions are clear: the potential is to make the make **biggest european show**!

As the time is running fast, we are starting right now. Please visit our website and check the floorplan and sponsorship packages. Everything is online, so you can check your best deal and book your place immediately.

Act fast so you are not the last! :)
